25X1		

In early January 1951, five AA guns of about 80 mm were observed to be emplaced in the area between the railroad line and the former German 54th Arty Regt Kaserne in Kuestrin-Kietz. The barracks installation, which had been enlarged, quartered 1,800 to 2,000 Soviet troops. * Passenger car stopped in front of the signal-communications control point at 9 Beyerstrasse, Kuestrin-Kietz. **

- * Comment. on 9 December 1950 that no AA guns were emplaced at the Oder River bridge. The AA guns mentioned in the present report are believed to have been emplaced there primarily for the training of troops quartered in the nearby barracks installation. However, their employment for the protection of the Oder River bridge also seems possible. The barracks installation on the island in the Oder River, Kuestrin-Altstadt, quarters elements of the unidentified AAA Div, possibly the 32nd. 25X1 25X1
- ** Comment. The motor vehicle indicates that the control point may be staffed by LVD personnel. 25X1
